GO BP − dose−adjusted residual genes
response to virus
defense response to virus
positive regulation of defense response
regulation of innate immune response
defense response to bacterium
antiviral innate immune response
response to interferon−beta
cellular response to interferon−beta
interferon−mediated signaling pathway
type I interferon−mediated signaling pathway
cellular response to type I interferon
response to type I interferon
killing of cells of another organism
disruption of cell in another organism
disruption of anatomical structure in another organism
negative regulation of viral process
lipid storage
defense response to protozoan
regulation of type I interferon−mediated signaling pathway
response to protozoan
